

ForNa® - Green roof tiles
➤ For roof pitches from 16° to 45°

ForNa® Green roof tiles 30

➔ For roofs with a pitch of 16° to 30°

- This green roof tile is suitable for all monopitch, sloping and shed roofs
- This makes it ideal for modern industrial and office buildings.
- These systems replaces roof tiles or other roof coverings at the same time, are waterproof and ensure rear ventilation
- There are no material costs for other roof coverings such as roof tiles or the like !!

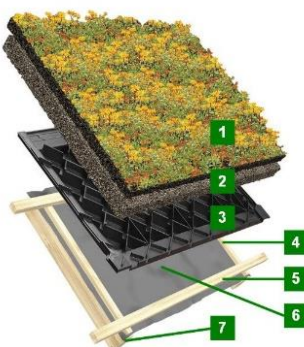

1. ForNa® plant mat
2. ForNa® substrate layer
3. ForNa® green roof tile 30
4. Counter battens
5. Roof battens 4/6 (Distance 25 cm)
6. Diffusion – open roof membrane
7. Rafters

ForNa® Green roof tiles 45

➔ Roofs with angles of inclination of up to 45°

- The green roof tile 45 is therefore the ideal element for saddle, hip and tent roofs
- For private residential construction
- Ideally suited after roof renovation because it can be placed on top of the existing roof architecture.
- There are no material costs for other roof coverings such as roof tiles or the like !!
